

FAST-TRACK HIGH PRESSURE DRILLING RISER DELIVERY.

Claxton's long heritage of supplying risers, combined with our large call-off inventory means we are often uniquely placed to deliver quickly... as this project, turned around in just four weeks, proves.

THE PROBLEM

Claxton was recently called upon to supply a drilling riser at short notice for a Norwegian water injection project. We used our existing inventory and fast-track design and supply capability to deliver.

THE SOLUTION

In addition to the 375ft riser, the Claxton supplied a full suite of associated tooling – including H4 connector, stress joint and tension joints. The job also used the propriety positive grip tension ring, a design pioneered by Claxton.

Unusually, the system used tension rings to provide centralization of the riser stack in addition to the more commonly used vertical tensioning configuration. In order to achieve the required horizontal force, Claxton supplied two tension joints and the top joint housed a tension ring pulled laterally with 25 tonnes of tension per pad eye.

Claxton also designed and built a work platform to provide a safer environment and process for the make up of the H4 connector.

THE RESULT

The Claxton team managed to turn the entire project around, from enquiry to mobilization, in just four weeks – a huge challenge given that the scope of supply called on multiple products and disciplines.

Just a few recent riser supply jobs are pictured on this page. Claxton has one of the largest jack up drilling riser supply stocks in Europe - possibly the world. Our full bore 18¾" full-bore systems are available in 5,000, 7,000 and 10,000 psi ratings. Additionally we supply slim-bore 13¾" systems in 5,000 and 6,000 psi. This inventory is supported by over 4,000 items of ancillary equipment and a full suite of tensioning and riser handling tooling - including our bespoke handling tool package which significantly enhances running time and safety.

MAKE IT HAPPEN.

Trust Claxton to make your project happen.

CLAXTON CAPABILITIES

Over 270 operators, contractors and rig owners have trusted Claxton to make their projects happen across the entire life of field – visit our website to find out why, or learn more about any of the products on this page.
